Tools: AWS | Selenium | Shopify | Figma | Blender | Photoshop | Linux
Others: HTML | CSS | GSAP | Git | Redux | Cloudinary | Nodemailer

PROJECTS

Instagram Analytics Tool (Social Crap)

August 2024

GitHub Repository: <https://github.com/saimjawed254/Social-Crap-Backend>

- Developed an automated Instagram scraper web app using Selenium integrated with Node.js that identifies the accounts of people who don't follow you back and also provides a Content Engagement Score.
- Frameworks and Languages used: **React, Node.js, Selenium, Express, MongoDB, Cloudinary, JavaScript, HTML, CSS.**
- Key Features:
 - Built a dynamic website using 3400+ lines of React and 900+ backend lines for seamless user experience and efficient server-side operations.
 - Facilitated seamless client-server data exchanges via API interactions, managing payloads up to 14 KB.
 - Implemented OTP-based authentication, subscription-based access, and integrated MongoDB, Cloudinary, and Nodemailer APIs for backend services and media handling.

Portfolio Website

July 2024

Deployed Website: <https://saimjawed.vercel.app>

- Developed a modern portfolio website based on MERN stack fundamentals.
- Frameworks and Languages used: **React, Node.js, Express, MongoDB, JavaScript, HTML, CSS.**
- Key Features:
 - Applied over 12,000 lines of CSS for smooth responsiveness across devices.
 - Enabled dark/light themes with Redux and React hooks for personalized UI.
 - Integrated 5+ micro-interactions and used MongoDB and Nodemailer for form handling.
