## PROJECTS

### Portfolio Website

July. 2024

*Website Link:* <https://saimjawed.vercel.app>

- Developed a modern Portfolio Website based on MERN Stack fundamentals.
- Frameworks and Languages used: **React, Node.js, Express, MongoDB, JavaScript, HTML, CSS.**
- Key Features:
  1. A futuristic and elegant web design with over 12000 lines of CSS code.
  2. Consists of both Light and Dark mode by the use of redux store and react hook concepts.
  3. Dynamic multi page website with MongoDB database and use of nodemailer API.

### Social Crap Web App

August. 2024

*Website Link:* <https://saimjawed.projects.linkedin>

- Developed an automated Instagram scraper web app using Selenium integrated with Node.js which shows the accounts of people who don't follow you back and also gives you a Content Engagement Score.
- Frameworks and Languages used: **React, Node.js, Selenium, Express, MongoDB, Cloudinary, JavaScript, HTML, CSS.**
- Key Features:
  1. A generative modern web design made with purely vanilla CSS.
  2. Consists of OTP based authentication and subscription based authorization.
  3. Dynamic multi page website with use of MongoDB database, Cloudinary and nodemailer APIs and multiple client server data exchange.
